

REPUBLIC STAGGARD TREAD TIRES

A car equipped with Republic Staggard Tread Tires is under complete control on wet and slimy pavements. The wheels will follow your slightest direction without slipping or skidding.

The Motorist Safeguard

The big solid rubber studs are arranged in six rows on the tread in such a way that they exert a positive resistance to side pressure from any direction at angles with the straight course and so make slipping or skidding impossible. Get a copy of our book "The Tire Perfect." Sent free on request.

A Pierce-Arrow Episode

Windsor V. Rice, P. C. Kittle, John S. Critchlow and Frank Botterill reached San Francisco on a pleasure trip from Salt Lake City in a 36-horsepower PIERCE-ARROW touring car ahead of schedule time.

The distance was approximately 1,000 miles.

The car was heavily loaded with baggage and four passengers.

It plowed through long and deep stretches of mud, forced its way over rocky roads, forded streams, climbed mountains and plunged through deep snow on the Sierras.

Yet not a tool was touched to the car during the entire trip, nor was an adjustment necessary.

The engine never missed a shot.

There was not even a tire puncture.

Despite bad roads, an average of 20 to 24 miles an hour, running time, was kept up during the greater part of the trip.

This is not an exceptional performance, but a mere incident showing what you can expect of the 36-horsepower PIERCE-ARROW, which we can deliver to you in Salt Lake, fully equipped, for \$4,385.
